# Local Internet Marketing

**Local Internet Marketing** is a Search Engine Optimization (SEO) service that we use to create better visibility for your websites.

We consistently work to see that Perma-Treat.com will rank ahead of competitors when Google searches are performed.

For example, searching “Clean Seal Granite Boise, ID” on Google populates Perma Treat on the first page of results, making us easier to find among competitors!

**We** take “keywords” such as granite, tile, stone, floors, counters, bathrooms, etc. to generate search phrases on Google. These searches are then linked to the services listed on the Perma Treat website.

Additionally, these search phrases are monitored, updated and optimized on a regular basis, based on performance.

This is where **regular webpage updates** come into play! Better content leads to better results!
